a
Random permanent labels
R1
R2
R3
R4
Different labels imply different molecules
b
Labels distinct across m molecules
Probability
Labels K
m = 2
m = 3
m = 4
RESI, K = 4: 75%, 38%, 9%
c
Exact identities, simulated label draws
132 comparisons
max |z| = 1.73
variance ratio 0.91–1.15
N(0, 1)
Comparisons
(Monte Carlo − exact) / s.e.
